SUMMARY : The present study was conducted in Parbhani district of Marathwada region of Maharashtra state. Parbhani, Jintur and Selu talukas of Parbhani district were purposively selected for study. 40 respondents were selected from each taluka on the basis of maximum area under green gram. Thus, a total of 120 respondents were selected as sample for this study. The respondents were interviewed with the help of well structured interview schedule. Majority of the green gram respondents were from medium farming experience, middle school level of education, joint family type extension contact, social participation, annual income, economic motivation, risk orientation, sources of information, market orientation with medium knowledge level of recommended package of practices of green gram.
