**Abstract :** The present study was conducted in Yavatmal district of Vidarbha region of Maharashtra state. The study of “Socio-economic impact of women related schemes on its beneficiaries.” was conducted in zari (jamni) taluka. The sample consisted of 120 beneficiaries of which socio-economic impact of women was calculated. The 10 villages were selected purposively from Yavatmal districts on the basis of were maximum beneficiaries took the benefit of scheme. An exploratory research design of social research was used in present investigation during 2021-22. The statistical methods such as frequencies, percentage, mean, standard deviation, correlation and z value were used. The data of research study show that age was negatively correlated and family type was non significantly correlated while education, family occupation, land holding, annual income, mass media and benefit availed were found to be positively and significantly related with socio-economic impact of women related schemes.
