**Abstract :** India made strides towards digitalization, which resulted in technological dominance. People utilize various methods of exploration internet, which has made life simple and pleasant. They interact with the unknown and discover new things almost anybody, at anytime, anywhere in the world. Cyber has been made possible by the digital realm. Their target is criminals, who are majority female. Cybercrime is now a significant problem. Women and children continue to be at risk in the face of the nation's law enforcement establishment. Offenders are bit by bit misusing Cyber platforms for voyeuristic purposes, using them to harass and abuse women and children. India's pleasures. A plea for upgrading the preventive, traditional system that is in place and well-equipped Cybercrime prevention and control depends on police officers with expertise and training. This Cybercrime and legislative intervention are the focus of the paper. A model is suggested and offers preventative measures aimed at reducing online offenses against women and children.

**Key Words :** Cybercrime, Harassment, Women, Digital platform, Cyber stalking, Law
