

# Effect of type of milk on yield and qualities of khoa

H.C.L. GUPTA AND DEVESH GUPTA

**ABSTRACT :** The experiment was conducted to study the suitability of different types of milk for khoa making. Twenty samples of milk were obtained each from local cow, cross bred cow and buffalo milk. It was concluded that khoa prepared from buffalo milk was of higher yield with better quality both in physical and chemical characteristics.

**KEY WORDS :** Khoa, Yield, Qualities, Local cow milk, Cross bred cow milk, Buffalo milk
