■ **ABSTRACT :** The study on effect of employment status of mother on Home and Educational Adjustment of her Adolescents was conducted in Bilha Block of Bilaspur District. The randomly selected samples of 100 students of standard X were studied which contains 50 from employed and 50 from unemployed mothers adolescents. High school Adjustment inventory (HSAI) was used for study of Home and Educational Adjustment. The investigation reveals that employment status of mothers has a significant influence on the educational and home adjustment of adolescents than unemployed mother.

■ **KEY WORDS:** Employment status, Educational adjustment, Home adjustments, Adolescents
