SUMMARY : Problems are the factors that limit the attitude or participation process and hence these can not be overlooked. In the present study, problems found during pre-testing were structured further mentioned one by one. Frequencies and percentage of each of them were worked out. The study was carried out on problems faced by rural youth while choosing agriculture as their profession during the year 2011-12. Data from 120 respondent's from 10 villages were collected from Amravati taluka of Amravati district in Maharashtra State and the interpretation and analysis were done.
