SUMMARY : Study of draft animals is important while discussing about Indian agriculture and national economy. In this study general vending practices about crossbred bullocks were studied in the selected cattle markets of Chandrapur district of Maharashtra. During study it was observed that the need of bullock for farm operation was the major reason behind purchase of bullocks and majority of bullocks purchased were non-descript. It was also observed that majority of sellers (73%) sale their adult bullocks.
