# Socio-economic status and personality of school going children

■ ONAM DAYAL AND NEHA DAYAL

Received: 19.05.2016; Revised: 22.10.2016; Accepted: 03.11.2016

■ **ABSTRACT** : Effect of socio-economic status was studied on the personality factors of children. Respondents were 300 school going children of age 7 to 13 years belongs to different socio-economic groups. A fourteen factor personality inventory CPQ (1979) by S.D. Kapoor was used to determine the personality factors of children. For statistical analysis one way ANOVA was applied. The results showed a significant effect of socio-economic status on the personality factors of children.
