Abstract : Although there are number of technologies designed and developed by many Scientists most of these are either not adopted or adopted partially by them. Very few technologies are found to become popular among the farm women. There are so many constraints in its use due to socio-economic bindings, situational or technological problems, they tend to reject the technology, discontinue its use or partially adopt it. Hence, the study was conducted to find out the various Problems faced by rural women in adoption of new technologies. The study was conducted on 100 respondents (20 from each selected village) of five villages of Gevarai Tehsil district Beed. The data was collected through interview method in 2017-18. The major problems expressed by majority of the respondents were technologies were costly, habit of using traditional method, not easily available in market, difficulty in acquire perfect skill, unavailability of raw material, poor family income etc for its adoption.

Key Words : Technologies, Adoption, Drudgery, Rural women, Women friendly
