Abstract : Caseous lymphadenitis (CLA) is a chronic bacterial disease caused by *Corynebacterium pseudotuberculosis*, which significantly impacts sheep and goat industries worldwide. In India, CLA is a growing concern in various sheep breeds, including the Nellore Jodipi sheep, a breed native to the Andhra Pradesh region. This review article discusses the prevalence, pathology, economic impact, diagnosis, prevention, and control measures for CLA in Nellore Jodipi sheep, with a focus on improving herd health and reducing economic losses..

Key Words : Caseous lymphadenitis, Nellore Jodipi sheep, *Corynebacterium pseudotuberculosis*, Sheep diseases, CLA in India, Biosecurity measures, Sheep vaccination
