ABSTRACT : IBA 5000 ppm produced maximum rooted layer (90.00%) in litchi cv. PURBI. IBA also proved better in producing more number of roots per layer (44.87), root length (4.67) and number of new leaves per layer (7.44). The roots were also thinner in IBA treated marcots (0.57 mm).

KEY WORDS : Rooting, Air layering, Bio-regulators, Litchi
