**Key words :** Ethno botany, Medicinal plant

### **INTRODUCTION**

Jaunpur an eastern district of U.P. is situated between  $25^{\circ}24' - 26^{\circ}12'$  north latitude and  $82^{\circ}07' - 83^{\circ}05'$  east longitude. Total area of the district is 4038 km<sup>2</sup>. Area is intersected by many perennial lakes locally called 'Tals'.

### **MATERIALS AND METHODS**

Extensive survey work was carried out. A number of medicine men having experience to utilize these plants were

consulted. During trips, observation, on morphological and ethno botanical importance was recorded. Plants were brought to the laboratory to the Department of Botany, T.D.P.G. College Jaunpur, were identified with the help of relevant floras (Duthie, 1903-1929; Haines, 1921-25).

### **RESULTS AND DISCUSSION**

The tabular chart (Table 1) was prepared on the basis of direct interviews and discussion with native medicine-men, vaidays and other interest persons in Ayurvedic
